TABLE OF CONTENTS

1	INTRODUCTION.....	1
2	MATERIALS AND METHODS	5
2.1	Study Area.....	5
2.2	Materials.....	8
2.3	Methods.....	8
2.3.1	Definition of the sampling scheme: area frame sampling ...	9
2.3.2	Selection of the satellite images.....	10
2.3.3	Mapping trees using visual image interpretation	11
2.3.4	Mapping trees using automatic detection/classification	12
2.3.4.1	Background	12
2.3.4.2	Image processing	13
2.3.4.3	Multitemporal analysis	15
2.3.5	Field validation of preliminary tree densities	16
2.3.6	Change detection of trees (2001-2006).....	17
3	RESULTS	19
3.1	Tree density maps from visual interpretation.....	19
3.1.1	Tree density by settlement frames	20
3.1.2	Tree count means related to distance from Baraagtaqol...	28
3.1.3	Final tree counts.....	29
3.1.4	Overall tree identification success.....	30
3.2	Tree maps from automatic detection.....	31
3.3	Rate of tree density change	34
4	CONCLUSIONS.....	35
5	BIBLIOGRAPHY	37
6	ANNEXES.....	39

LIST OF FIGURES

Figure 1: Charcoal production in Somalia (Source: a) FAOSTAT; b) Baxter, 2007)	1
Figure 2: Tiger bush map for Somalia. (Source: Paron and Goudie, 2006). The grey colours identify the five different types of tiger bush. The capital letters A, B and C identify the main areas of presence of tiger bush.	3
Figure 3: The study area.....	5
Figure 4: Land cover map of the study area.....	7
Figure 5: Methodological framework	8
Figure 7: The Tree Counting sampling Frames.....	10
Figure 8: The Photo interpretation key.....	11
Figure 9: Results of the tree detection analysis shown as contours on a small subset of the pansharpended Quickbird image	15
Figure 10: Results of the tree detection analysis on the Ikonos image of 2001 (left) and the corresponding image of 2005 (right).....	16
Figure 11: Map of tree densities for Baraktaqol	19
Figure 12: Tree counts in image sampling frame 1	20
Figure 13: a) Wardheer area in December 2001, b) Soil Bunds in Wardheer Area in September 2006 (Vegetation around bunds includes Andropogon kellery, Chrysopogon aucheri and others).....	21
Figure 14: Tree counts in image sampling frame 2	22
Figure 15: Increase in trees	22
Figure 16: Tree counts in image sampling frame 3	23
Figure 17: Tree counts in frame 3	23
Figure 18: Tree counts in image sampling frame 4	24
Figure 19: Tree counts in image sampling frame 5	25
Figure 20: Tree counts in image sampling frame 6	26
Figure 21: Multi-year satellite Image Interpretation - Baraagtaqol	26
Figure 22: Tree counts in image sampling frame 7	27
Figure 23: Tree counts in image sampling frame 8	28
Figure 24: Tree count means with distance from Baraagtaqol.....	29
Figure 25: Overall tree density for the IKONOS and Quick Bird counts.....	30
Figure 26: Results of the automatic detection (in red) and the visual interpretation (in green) for a small subset of frame 8.....	32

LIST OF TABLES

Table 1: Tree counts in frame 01.....	20
Table 3: Tree counts in frame 03.....	23
Table 4: Tree counts in frame 04.....	24
Table 5: Tree counts in frame 05.....	25
Table 6: Tree counts in frame 06.....	26
Table 7: Tree counts in frame 07.....	27
Table 8: Tree counts in frame 08.....	28
Table 9: Overall tree counts for the IKONOS and QUICKBIRD images	29
Table 10: Overall average identification success for trees sited on the images .	31
Table 11: Tree densities over the two time periods (2001 and 2006).....	34

Acknowledgments

The authors wish to acknowledge the considerable support given by the Joint Research Centre (JRC) of the European Commission (EC) for providing the high resolution satellite images (IKONOS and Quick Bird) for this study and in particular to Andrea Baraldi (JRC staff at the time of this work) for his precious inputs in the development of the automatic tree detection procedure.

We wish to thank the Somali surveyor, Mr. Ali Ahmed Omar who efficiently carried out the fieldwork.

We also wish to acknowledge the immense contributions from our colleagues at FAO-SWALIM in different areas. Lastly we thank the Chief Technical Advisor of FAO-SWALIM, Dr. Zoltan Balint for his technical and administrative support.

LIST OF ACRONYMS

AFS – Area Frame Sampling

EC – European Commission

FAO - Food and Agriculture Organisation

GIS – Geographic Information Systems

GPS – Global Positioning Satellite

JRC – Joint Research Centre

MOI – Materials of Interest

NGO – Non Governmental Organisation

NOAA – National Oceanic and Atmospheric Administration

SWALIM – Somalia Water and Water Information Management

UNEP – United Nations Environment Programme

VHR – Very High Resolution
