

SOIL EROSION AND SEDIMENTATION MODELLING AND MONITORING OF THE AREAS BETWEEN RIVERS JUBA AND SHABELLE IN SOUTHERN SOMALIA

Project Report N°L-16

June 2009

Somalia Water and Land Information Management
 Ngecha Road, Lake View. P.O Box 30470-00100, Nairobi, Kenya.

The designations employed and the presentation of material in this information product do not imply the express opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

This document should be cited as follows:

FAO-SWALIM Technical Report No. L-16: Omuto, C.T., Vargas, R. R., Paron, P. 2009. Soil erosion and sedimentation modelling and monitoring framework of the areas between rivers Juba and Shabelle in southern Somalia. Nairobi, Kenya.

Acknowledgements

We wish to acknowledge the considerable support and guidance given by FAO-SWALIM's CTA Dr. Zoltan Balint.

A special acknowledge also goes to all field officers who collected the samples used in this study.

The XRD analysis could not have been performed without the support of Prof. Ciriaco Giampaolo of the Department of Geological Sciences of University Roma TRE, in Rome, Italy. We do appreciate the support given.

Finally we express our acknowledgment to all FAO-SWALIM staff for their input during data collection and analysis.

List of figure	vi
List of tables	viii
List of acronyms	ix
1. INTRODUCTION	1
1.1 Background	1
1.2 Definition of terms associated with soil erosion and sedimentation	2
1.2.1 Soil erosion.....	2
1.2.2 Sedimentation.....	4
1.3 Modelling of soil erosion and sediment flux	5
1.4 Approach for preliminary study of soil erosion and sedimentation study in south Somalia	8
2. STUDY AREA	11
2.1 Rainfall distribution	11
2.2 Geology and soil	12
2.3 Land cover and land use	14
3. MATERIALS AND METHODS	15
3.1 Data sources.....	15
3.1.1 Sediment sampling and river discharge measurements	15
3.1.2 Other datasets	20
3.2. X-Ray Diffractometry (XRD).....	21

3.3	Soil erosion modelling and estimation of sediment yields	24
4.	RESULTS AND DISCUSSIONS	28
4.1	Modelling of topsoil loss	28
4.2	Comparison of modelling and rating curve estimates of sediment yield	30
4.3	X-Ray diffractometry	33
4.4	Potential sites for monitoring sediments	36
5.	RECOMMENDATIONS FOR MONITORING EROSION AND SEDIMENTATION IN SOUTH SOMALIA	38
5.1	Theoretical framework for monitoring soil erosion and sedimentation	38
5.1.1	Monitoring soil erosion	39
5.1.2	Monitoring sediment sources	42
5.1.3	Monitoring suspended sediment discharge.....	44
5.2	Practical steps towards monitoring soil erosion and sedimentation in south Somalia.....	46
6.	CONCLUSIONS AND RECOMMENDATIONS	48
6.1	Conclusions	48
6.1.1	Potential sources of sediments.....	48
6.1.2	Techniques and opportunities for monitoring sediments yields.....	48
6.2	Recommendations	48

Table 4.2: Sediment yield from the rating curve compared with modelling.....	30
Table 5.1: Practical steps towards monitoring soil erosion and sedimentation in south Somalia	47
Table 5.2: Potential requirements for implementing soil erosion and sedimentation monitoring framework	47
Table A.1: Guidelines for determining runoff curve numbers.....	55

List of acronyms

CN	- Curve Number
CTA	- Chief Technical Advisor
FAO	- Food and Agriculture Organisation
ITCZ	- Inter-Tropical Convergence Zone
MODIS	- Moderate Resolution Imaging Spectrometer
MUSLE	- Modified Universal Soil Loss Equation
PVC	- Polyvinyl Chloride
RUSLE	- Revised Universal Soil Loss Equation
SDR	- Sediment Delivery Ratio
SCS	- Soil Conservation Service
SSC	- Suspended Sediment Concentration
SWALIM	- Somalia Water and Land Information Management
TSS	- Total Suspended Solids
XRD	- X-Ray Diffractometry
