**Using the Reference Grid to Report Locations**

The grid divides Somalia into 404 rectangles each corresponding to the internationally recognized topographic map tiles.

Each of these rectangles is given a unique alpha-numeric reference number. Each of these rectangles is then sub-divided into 80 square cells, 10 across and 8 down. Each square cell is approximately 5 km by 5 km, representing an area of 25 square km. The square cells are referenced from A to K horizontally, and from 1 to 8 vertically.

To report your position:

- Locate the square cell you are in on the map using an estimated distance and direction from known points such as clinics, schools or settlements as a guide.
- Note the alphanumeric rectangle code (e.g. NC-38-064).
- Note the numeric reference of the square cell.
- Note the alphabetic reference of the square cell.
- When reporting your position, quote the full grid reference by combining the two references (e.g. NC-38-064-SA).

The boundaries and names on this map do not imply official endorsement or acceptance by the United Nations.
