USING THE REFERENCE GRID TO REPORT LOCATIONS

The grid divides Somalia into 404 rectangles each corresponding to The internationally recognized topographic map tiles. Each of these rectangles is given a unique alpha-numeric reference number. Each of these rectangles is then sub-divided into 60 square cells, 10 across and 6 down. Each square cell is approximately 5 km by 5km, representing an area of 25 square km. The square cells are referenced from A to K horizontally and from 1 to 6 vertically.

To report your position:

- Locate the square cell you are in on the map using estimated distance and direction from a known point such as a Clinics, schools or settlements as a guide.
- Note that the alpha-numeric rectangle code (e.g. NA-38-099)
- Note the Numeric reference of the square cell
- Note the Alphabetic reference of the square cell.
- When reporting your position, quote the full grid reference by combining the two references (e.g. NA-38-099-1K).

Map Production: Somalia Water and Land Information Management Project (SWALIM) and United Nations High Commissioner for Refugees (UNHCR) Branch Office- Somalia

SWALIM is implemented by the United Nations Food & Agriculture Organisation.

SWALIM is funded by European Commission with 5% co-funding provided by UNICEF.

The Humanitarian Reference Grid is a common reference system for all agencies working in Somalia. The system has been designed for reporting of geographic location in the field, without the use of a GPS.
