XUDUN DISTRICT - SOOL
WITH HUMANITARIAN REFERENCE GRID

Legend

- Settlements
- UNICEF Schools 98-99
- UNICEF Clinics
- Airfields
- District Capitals
- Regions
- 100,000 Grid
- Humanitarian Reference Grid
- Districts
- Rivers from Landsat
- Road Type from Topo Maps

Using the Reference Grid to Report Locations

The grid divides Somalia into 404 rectangles each corresponding to the internationally recognized topographic map files.

Each of these rectangles is given a unique alpha-numerical reference number. Each of these rectangles is then sub-divided into 80 square cells, 10 across and 8 down. Each square cell is approximately 5 km by 5 km, representing an area of 25 square km. The square cells are referenced from A to K horizontally, and from 1 to 8 vertically.

To report your position:

- Locate the square cell you are in on the map using an estimated distance and direction from known points such as clinics, schools or settlements as a guide.
- Note the alpha-numeric rectangle code (e.g. NC-38-120).
- Note the Numeric reference of the square cell.
- Note the Alphabetic reference of the square cell.
- When reporting your position, quote the full grid reference by combining the two references (e.g. NC-38-120-3J).

Map Production: Somalia Water and Land Information Management Project (SWALIM) and United Nations High Commissioner for Refugees (UNHCR) Branch Office-Somalia

SWALIM is implemented by the United Nations Food & Agriculture Organisation, SWALIM is funded by European Commission with 5% co-funding provided by UNICEF.

The Somalia Reference Grid is a common reference system for all agencies working in Somalia. The system has been designed for reporting of geographic location in the field, without the use of a GPS.

The boundaries and names on this map do not imply official endorsement or acceptance by the United Nations.
