## TABLE OF CONTENTS

<b>1</b>	<b>INTRODUCTION.....</b>	<b>1</b>
<b>2</b>	<b>MATERIALS AND METHODS .....</b>	<b>5</b>
2.1	Study Area.....	5
2.2	Materials.....	8
2.3	Methods.....	8
2.3.1	Definition of the sampling scheme: area frame sampling ...	9
2.3.2	Selection of the satellite images.....	10
2.3.3	Mapping trees using visual image interpretation .....	11
2.3.4	Mapping trees using automatic detection/classification ....	12
2.3.4.1	Background .....	12
2.3.4.2	Image processing .....	13
2.3.4.3	Multitemporal analysis .....	15
2.3.5	Field validation of preliminary tree densities .....	16
2.3.6	Change detection of trees (2001-2006).....	17
<b>3</b>	<b>RESULTS .....</b>	<b>19</b>
3.1	Tree density maps from visual interpretation.....	19
3.1.1	Tree density by settlement frames .....	20
3.1.2	Tree count means related to distance from Baraagtaqol...	28
3.1.3	Final tree counts.....	29
3.1.4	Overall tree identification success.....	30
3.2	Tree maps from automatic detection.....	31
3.3	Rate of tree density change .....	34
<b>4</b>	<b>CONCLUSIONS.....</b>	<b>35</b>
<b>5</b>	<b>BIBLIOGRAPHY .....</b>	<b>37</b>
<b>6</b>	<b>ANNEXES.....</b>	<b>39</b>

## LIST OF FIGURES

<b>Figure 1:</b> Charcoal production in Somalia (Source: a) FAOSTAT; b) Baxter, 2007)	1
<b>Figure 2:</b> Tiger bush map for Somalia. (Source: Paron and Goudie, 2006). The grey colours identify the five different types of tiger bush. The capital letters A, B and C identify the main areas of presence of tiger bush.	3
<b>Figure 3:</b> The study area.	5
<b>Figure 4:</b> Land cover map of the study area.	7
<b>Figure 5:</b> Methodological framework	8
<b>Figure 7:</b> The Tree Counting sampling Frames.	10
<b>Figure 8:</b> The Photo interpretation key	11
<b>Figure 9:</b> Results of the tree detection analysis shown as contours on a small subset of the pansharpended Quickbird image	15
<b>Figure 10:</b> Results of the tree detection analysis on the Ikonos image of 2001 (left) and the corresponding image of 2005 (right).	16

<b>Figure 26:</b> Results of the automatic detection (in red) and the visual interpretation ( in green) for a small subset of frame 8.	32

## LIST OF TABLES

<b>Table 1:</b> Tree counts in frame 01	20
<b>Table 3:</b> Tree counts in frame 03	23
<b>Table 4:</b> Tree counts in frame 04	24
<b>Table 5:</b> Tree counts in frame 05	25
<b>Table 6:</b> Tree counts in frame 06	26
<b>Table 7:</b> Tree counts in frame 07	27
<b>Table 8:</b> Tree counts in frame 08	28
<b>Table 9:</b> Overall tree counts for the IKONOS and QUICKBIRD images	29
<b>Table 10:</b> Overall average identification success for trees sited on the images	31
<b>Table 11:</b> Tree densities over the two time periods (2001 and 2006)	34

## **Acknowledgments**

The authors wish to acknowledge the considerable support given by the Joint Research Centre (JRC) of the European Commission (EC) for providing the high resolution satellite images (IKONOS and Quick Bird) for this study and in particular to Andrea Baraldi (JRC staff at the time of this work) for his precious inputs in the development of the automatic tree detection procedure.

We wish to thank the Somali surveyor, Mr. Ali Ahmed Omar who efficiently carried out the fieldwork.

We also wish to acknowledge the immense contributions from our colleagues at FAO-SWALIM in different areas. Lastly we thank the Chief Technical Advisor of FAO-SWALIM, Dr. Zoltan Balint for his technical and administrative support.

## **LIST OF ACRONYMS**

AFS – Area Frame Sampling

EC – European Commission

FAO - Food and Agriculture Organisation

GIS – Geographic Information Systems

GPS – Global Positioning Satellite

JRC – Joint Research Centre

MOI – Materials of Interest

NGO – Non Governmental Organisation

NOAA – National Oceanic and Atmospheric Administration

SWALIM – Somalia Water and Water Information Management

UNEP – United Nations Environment Programme

VHR – Very High Resolution
