

Somalia Rainfall Forecast

Issued: 17 May 2017

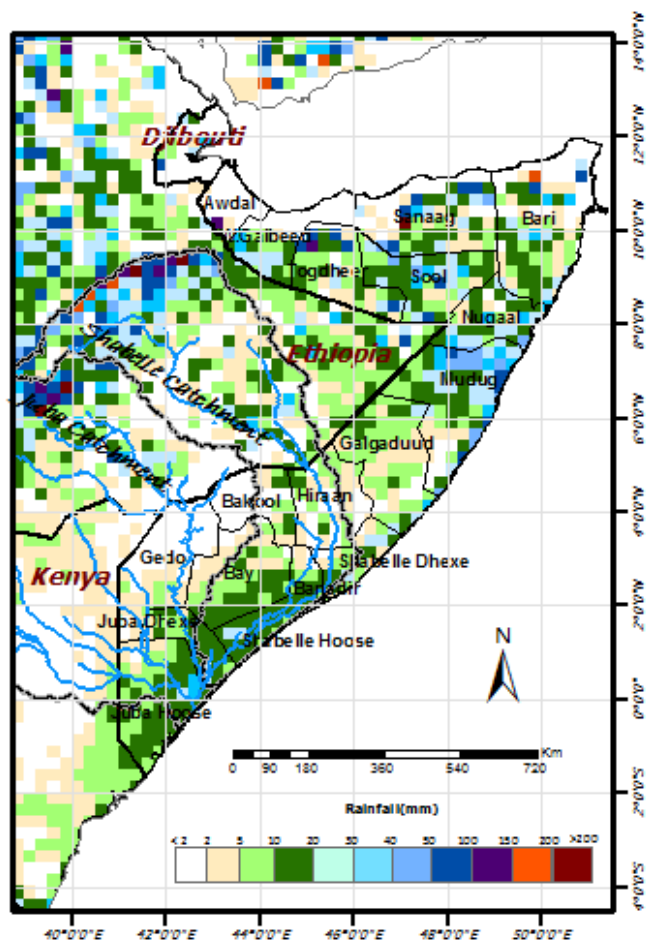

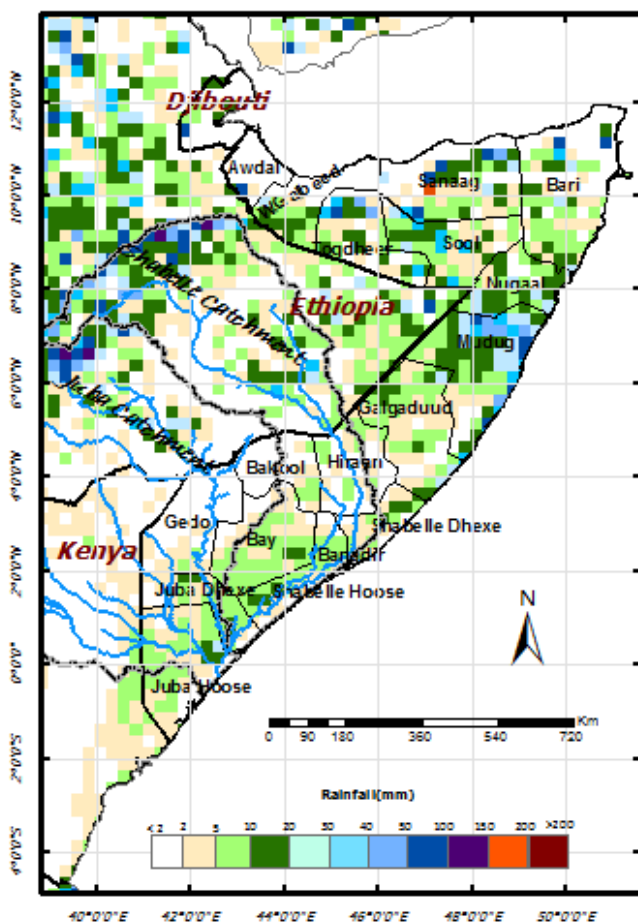

The northern parts of the country and coastal areas in the south will continue to receive rains in the next three days (Map 1).

The rainfall forecast for the coming week (Map – 2) is pointing towards moderate to heavy rains in the basins both in the Ethiopian highlands and inside Somalia. Many areas in Puntland and Somaliland will also continue to receive rains during this period

Users are advised that this is a forecast and at times there may be discrepancies between forecast and actual amounts of rainfall received. The forecast, observed river levels and rainfall amounts are updated on a daily basis and can be found on this link: <http://systems.fao.net/frrims/>

Map 1: 3 days rainfall forecast

Map 2: 7-day cumulated rainfall forecast
