

Somalia Rainfall Forecast

Issued: 23 May 2017

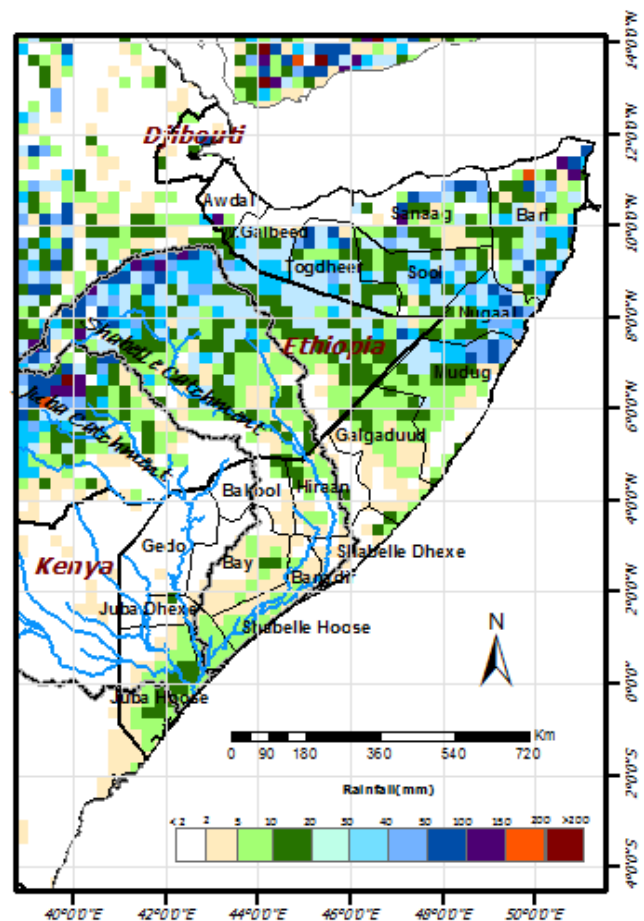

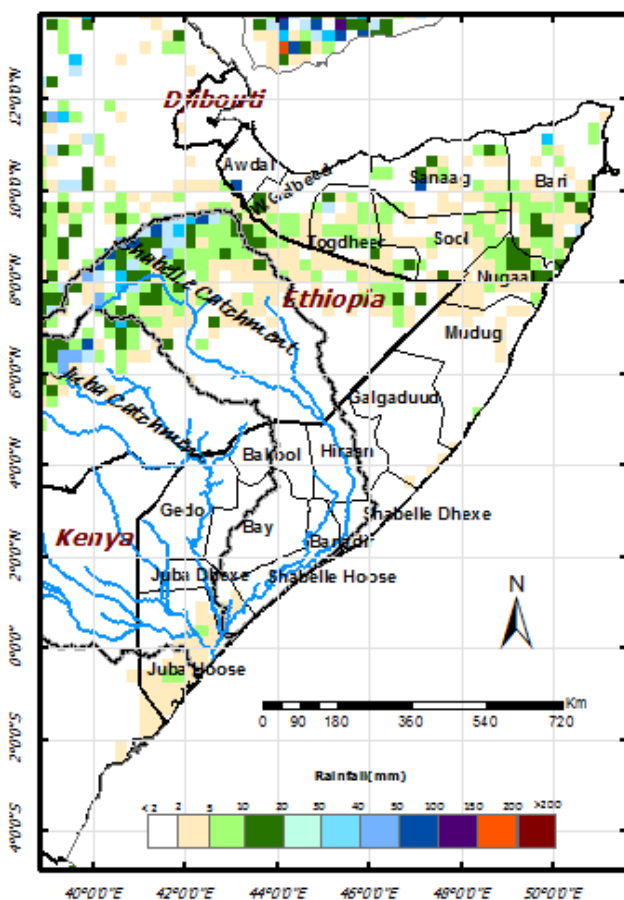

Most regions of Somalia will remain dry for the next three days, apart from few areas in Somaliland and Puntland where light showers are expected in the same period (Map 1).

The rainfall forecast for the coming week (Map – 2) is pointing towards light to moderate rains in Puntland and parts of Somaliland. Light rains are also expected in a few areas in the Central and coastal areas of the South. The upper parts of Ethiopian highlands are expected to receive moderate rains.

Users are advised that this is a forecast and at times there may be discrepancies between forecast and actual amounts of rainfall received. The forecast, observed river levels and rainfall amounts are updated on a daily basis and can be found on this link: <http://systems.fao.net/frrims/>
