

Shabelle and Juba Riverine Basin Population Displacement Estimates - Gu seasonal rains 2010

Region/District	UNDP 2005 Total Population ¹	BEST PLANNING ESTIMATES:		Current Status: 07/05 12:00 p.m 1. No floods reported 2. Confirmed floods, no displacement ⁴ 3. Confirmed flood with displacement, no numbers reported 4. Reported floods, confirmation pending for floods and displacement 5. Confirmed reports	Comments:
		Based on Actual 2006 Flood Displacement ⁴	Current Flood Displacement Estimates as of: 07/05 12:00 p.m.5		
Hiran	329,811	104,000			
Belet Weyne/Matabaan	172,049	80,000		1	
Bulo Burti/Maxaas	111,038	9,000		1	
Jalalaqsi	46,724	15,000		5	Flooded crop fields (about 420ha of maize, cowpeas & sesame)
Middle Shabelle	405,264	159,000			
Jowhar/Mahadey	269,257	126,000		5	Flooded crop fields in 19 villages (about 2625ha of maize, cowpeas & sesame)
Balcad/Warshaiikh	136,007	33,000		1	
Lower Shabelle	850,651	36,000 ²			
Afgooye/Aw Dheegle	211,712	9,000		1	
Marka	192,939	0		1	
Qoryooley	134,205	0		1	
Kurtunwaarey	55,445	19,000		1	
Wanlaweyne	155,643	No Data		1	
Sablale	43,055	5,000		1	
Brava	57,652	3,000		1	
Gedo	209,683	36,000			
Dolow	26,495	7,200		1	
Garbahaarey	38,017	4,800		1	
Baardheere	106,172	15,000		1	
Burdubo	19,003	9,000		1	
Ceel Waq	19,996	No Data		1	
Middle Juba	238,877	102,000			
Jilib	113,415	70,000		2	Flooded crop fields
Buale	59,489	17,000		2	Flooded crop fields
Sakow/Salagle	65,973	15,000		2	Flooded crop fields
Lower Juba	295,816	17,500 ³			
Jamame	129,149	17,500		5	Flooded crop fields (120ha) and 3000 house holds
Kismayo	166,667	No Data		1	
	2,330,102	454,500	0	37	

Working assumptions:

- Displaced population defined as direct displacement through flood inundation
- Displaced population calculated by multiplying the number of hh's by hh size of 6
- If a range is provided to quantify displacement the upper figure is used

Footnotes:

1. Population estimates by region/district, UNDP Somalia, August 1, 2005
2. Comprehensive reports indicated minimum displacement in Lower Shabelle in 2006

3. Kismayo district reported floods but no population displaced was given in 2006
4. 2006 estimates derived from field reports, flood projection model and UNOSAT imagery; see ochaonline.un.org/OchaLinkClick.aspx?ink=ocha&docId=1123747
5. Table updated daily with cut-off point of new information at 4:00pm. Best estimates are based on triangulation of all available field information
6. Floods with no displacement might be due to flooding on fallow land, crop lands, encircled houses, low flood water levels, etc. Contact floodinfo@fsnau.org for details
